Proposals for Furnishing Mail Locks.

POST OFFICE DEPARTMENT, April 22, 1861

Sealed Profusals for farnishing mail tooks and keys now used on the United States mid, will be received at this Department until some o'clock A. M. the tenth day of it being desirable to clock A. M. the tenth day of it being desirable to clock A. It being desirable to obtain locks and keys of a new con-struction, and invented expressly for the exclusive use of the United States mails, to made is prescribed for bidders; the bepartment relying for its selection on the results of mechanical skill and ingenuity which a fair competition, now invited, may produce. It is decomed necessary only to state that a mail lock should be self-decking, and that as other practical requisities are uniformity, scenificy, lightness, strength, disrat. Bits, necelly of construction, and facility of the.

strength, discribing, movely of construction, and justified first.

Two kinds of mail locks and keys—one of briass and the other of from—different in form and construction, are required; and proposals should specify, separately, the price of each from lock, each key for same, each briass lock, and each briass key for same.

Duplicate samples or patterns of each kind of locks proposed, are required to be submitted with the proposals, one of each kind of sample locks to be revotted up and finished, and another to be open or unrivetted, so that its intended, and another to be open or unrivetted, so that its intended, and another to be open or unrivetted, so that its intended, and another to be open or unrivetted, so that its intended, and another to be open or unrivetted, so that its intended to plainly marked with the bidier's name.

The locks offered should not be patented, nor should their internal construction be otherwise publicly known, or be similar to any locks heretofore used; and they must be warranted bot, in any way, to infringe or interfere with any patented invention.

The locks offered should not be patented, nor should their internal construction be otherwise publicly known, or be similar to any locks heretofore used; and they must be warranted bot, is any way, to intring or interfere with any patented invention.

The various sample locks presented by bidders will be submitted to a board of examiners to be commissioned by the Postmaster General, for the purpose of examining and reporting on them; and, unless the Postmaster General shall deem it to be for the interest of the Department to reject all the proposals and apectinens submitted under this advertisement, contracts will, upon the report of the examiners, be entered into, as soon as practicable, with the successful bidder whose locks are adopted, for turnishing similar locks and keys for four years, as they may be required and erdered; with the right, on the part of the Postmaster General for the time being, to extend and continue the contract in force for an additional term of lour years, on giving notice, in writing, to the contractor, not less than as months before the termination of the first term of lour years, to contract with any other party for formaling similar or different locks and keys, as the Postmaster General may determine. The contractor must agree and be able to formab, if required and ordered, 6,000 brass locks and 600 brass keys, within these months from the time of entering into contract, and 30,000 from locks and 30,000 from keys, within eight months from sections. But the Postmaster General will reserve the right to increase or diminish, as the wants or interests of the service may demand, the quantities of the fertice may demand, the quantities or interests of the service may demand, the quantities or interests of the service may demand, the quantities or interests of the service may demand, the quantities or the locks and keys above specified, with a proportionate altowance of time to farmish them.

All the locks formished by the outractor must be warranted to keep in good working order for two

DYSPEPSIA, INDIGESTION, Weakness or Debility, Flatulency and Nausea, Loss of Appetite, Fervousness, Liver Com-plaints, Billous Fevers, and all Diseases of the Stomach, Liver, and Bowels. AS A PREVENTIVE FOR PEVER AND AGUE,

W. P. & A. W. GREELEY, Proprietors, Boston.

THE OBJECT of all medicine is either to prerent disease, or to assist Nature in restoring the various organs of the body to a heathful action, and that medicine is certainly the best which will perform those offices thoroughly, yet mildly, and without endangering the vital forces of the system, by whose normal condition alone health and strength can be preserved. Most of the Bitters that have heretofore been brought into popular favor, have only served the purpose of temporarily stimulating or exciting the organs into condition resembling healthful action, without any remedial effect, and generally followed by a return of the disease, or a prostration of nervous energy more disastrous than though Nature had

been left to take its own course. Dr. Greeley's Bitters are a preparation of the nutritive properties of the grain of the fields in combination with the active principle of many simple alteratives and bitter tonics, and it is a pleasure to the proprietors to state that its usefulness is being generally acknowledged by the largely-increasing consumption in those sections where it is best known, and by the testimony of many eminent physicians, who have not only made trial of it, but continually prescribe the Bitters in those cases for which it is recom-

AGED PEOPLE, AND ALL WEAKLY PER-SONS, Consumptive patients, and others, whose constitutions have become impaired by time, or enfeebled by disease, and in whom the process of digestion does not replace the fat and tissues of the body as fast as they waste, will find these Bitters at once nourishing and strengthening, and happily adapted for their use. The great advantage the Bitters possess over ordinary stimulants usually prescribed in treating lung complaints and kindred diseases, is the fact that they combine many safe and certain healing properties in connection with the best known

stimulant.

DELICATE LADIES Will derive great benefit from it. No unpleasant effect will ever result from taking the Bitters, if

exhaustion, and in all cases of weakness, the Bitters are not equalled. As an agreeable stomachic, it is much admired; it sharpens the appetite, brightens the intellect, and infuses new life and vigor. No one

the directions are followed. For those who suf-

fer from nervous debility, languor, want of rest,

who uses these Bitters can be subject to an attack of FEVER and AGUE, or DIARRHOEA. Of all the ills that afflict men and women, few are so appnizing as Dyspensia. It is a sort of combination of many discases. Thanks to science and Dr. Greeley, a specific has now been ob-tained. Greeley's Bocason Bitters take straight hold of the disease, and begin a cure. Thouhold of the disease, and orgin a cure sands of well-attested cases of cures of Dyspepsis, Indigestion, and Fever and Ague, even of the most desperate kind, are in the possession of

the proprietors. Not a few people, everywhere, complain of Weakness or Debility. This is the gentle hint of nature for a little help in the way of invigoration. The hint should not be neglected. "A stitch in time saves nine." Get a supply of GREE-LEY'S BOURSON BITTERS, take them regu srry, and our word for it you will teel better live lon stronger, and think and act with very much more satisfaction. The Bitters are a tonic, and of a nature never before attained in any medicine. It will make the weak strong, the desponding hopeful, the sick well. For any complaint of the Stomach, Liver, or Bowels, there is nothing com-

parable with this medicine In America, the Liver is the best abused of all the organs in the body. It is made the saddle of all other organs. As a consequence, it is often out of order, and not unfrequently nearly inoperative. This need not be; on the contrary, it is quite unnecessary. A little common sease, and a sufficiency of GREELEY'S BOURSON BITTERS, will keep the Liver right, and make man a man, and wo-man, now miserable, quite happy. The Bitters regulate and strengthen the Liver, no less than

purify it.

The increase of Nervous Disorders, at the present day, is one of the most starming indicate of the age, or rather, would be, were it not that a most admirable cure had been found. There is not a phase of Nervous disease, whatever it may be, that these Bitters will not act upon favorably, and in the most efficient manner. All who are unfortunately afficted with complaints of this nature, or with Indigestion, or any dis-eases of the Stomach, should not tail to make use of Greekey's Bourney Bitters.

Chills and Fever. In many portions of the United States this terrible disease seizes its victime as naturally as water seeks its level. The system in a particular condition invites it. The right medicine to prevent and cure this right in divine to prevent and cure this malady, we unhesitatingly say, is Greeker's Bournon Bitters. It breaks up the fever, drives it from the system, and will keep it at bay, if taken in accordance with directions on the bottle. The Bitters purify and enrich the blood, and this in return strengthens the constitution. As an agree-

able tonic, these Bitters have no equal.

Greeley's Bourbon Bitters are meeting a sale unparalleled in the history of popular medicines. In all diseases of the Stoma h and Bowels they are a sovereign cure. The worst cases of Dys-pepsia and Indigestion yield to the remarkable potency of the Bitters, which is as agreeable to the taste as it is speedy and unfailing in its good
